INTRODUCTION

This eighth edition of Current and Noncurrent Journals in the NIH Library reflects holdings as of March 15, 1994. Journal titles are listed as they appear on the title page, in alphabetical order. Those which begin with initials are arranged as though the initials are words.

The journal holding statements generally have the following formats:

v. 42- 1962-
 and
v. 1, 1950 - v.38, 1987

The first format indicates that the Library has the journal starting with v.42, 1962 and is still receiving it. When the second format is used, it signifies that the Library holds inclusive volumes 1 through 38, years 1950 to 1987. The Library is no longer receiving this title because publication has ceased, the title has changed, or the Library has cancelled its subscription.
